

INTRODUCTION TO LLB CAPITAL

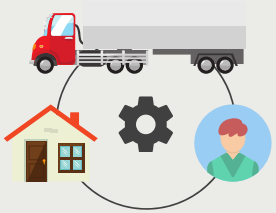

LLB CAPITAL SUMMARY

A leading supply and trading company of low-carbon fuel products & green certificates

“We support the energy transition by providing reliable access to verified green certificates and sustainable fuels, helping businesses meet their decarbonisation and compliance goals”

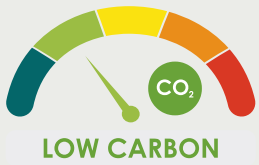

OPERATIONAL PILLAR

SUPPLY TRADING & TECHNOLOGY

Our ability to manage our contractual commitments and offtake agreements require the use of technology to assist with marketing, transport management & trade risk

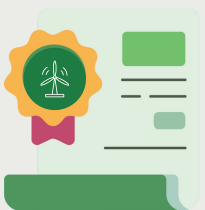

LOW-CARBON POWER

Local power (1-10mwh) – is a key focus of LLB Capital's growth strategy. Partnerships and Collaboration will play a vital role in this area of development

OFF-TAKE COMPLIANCE CERTIFICATES

The portfolio of products we manage include government-mandated credits (GOs, ROCs/REGOs), which certify renewable electricity production and consumption

SUPPORTING VOLUNTARY CERTIFICATES

Voluntary certificates (Example: Natural Capital Credits, NCCs) traded for corporates to offset emissions, claim carbon-neutrality, and fund new renewable projects

GREEN CERTIFICATES

Summary

What?

Digital proof of sustainable activities which can relate to power, fuel, farming and others

Why?

Enables accurate tracking of sustainable initiatives including power generation

How?

Bought & retired on a authorised registry

*Focus:

Green certificates applicable to heat & power generation and consumption

COMPLIANCE

Government issued credits - meeting renewable energy rules and requirements

Tradable or can be retired

VOLUNTARY

Companies use to support their green credentials

**Europe: UK,
Netherlands,
France, Germany
and Denmark**

LLB CAPITAL KEY GEOGRAPHIES

**Worldwide: UAE
and Africa**

LLB CAPITAL FOCUS

COMPLIANCE CERTIFICATES

RGGOs

REGOs

ROCs

RTFCs

GOs

Suitable for:

Utilities, refineries and large commercial businesses usually acquire the certificates and retire them to meet renewable-energy targets

SUPPLY AND TRADING

- **RGGOs** (Renewable Gas Guarantees of Origin): Certificates that prove a given volume of gas was produced from renewable sources and injected into the grid
- **REGOs** (Renewable Energy Guarantees of Origin): Certificates that provide transparency to consumers about the proportion of electricity that suppliers source from renewable sources
- **ROCs** (Renewables Obligation Certificates): Tradable certificates awarded to UK renewable electricity generators under the Renewables Obligation scheme, incentivising low-carbon power
- **RTFCs** (Renewable Transport Fuel Certificates): Certificates issued under the UK RTFO to producers and suppliers of low-carbon fuels. This provides evidencing, that a stated volume of transport fuel meets renewable content obligations. The obligation applies to suppliers/producers placing 450,000 litres or more per year of eligible fuel into relevant transport uses

VOLUNTARY CERTIFICATES

Certificates that companies can purchase to demonstrate green credentials and offset carbon beyond legal requirements

REGOs

As well as being a compliance certificate, they can also be traded or retired for net zero claims

IRECs

- A compliance tool used to meet national and regional renewable energy mandates and regulatory targets, as well as voluntary sustainability commitments like the Greenhouse Gas Protocol

Other suitable applications

the registry/issuing
body name

- Sustainability Reporting (CDP, SBTi, TCFD)
- Net-Zero Claims (Scope 2/3 offsets + GO retirements)
- Brand Assurance (Demonstrate green credentials)

LLB CAPITAL - VALUE ADD

We can support your business:

Advisory Capacity:

- Choose the optimal mix of physical low-carbon fuels that encourage sustainability and entitle you to the benefit of holding tradable certificates
- Align your business growth strategy with UK/EU compliance certificates

By Sourcing & Trading:

- Procure and trade green certificates at competitive prices
- Source and trade low-carbon feedstocks eligible for some green certificates that provide a premium

With Compliance, Retirement & Reporting:

- Operate registry accounts, retire certificates and prepare audit-ready evidence packs
